

THIRD CANADIAN POLAR DATA WORKSHOP:18-21 FEBRUARY 2020, BANFF, AB

Banff Centre for the Arts, 107 Tunnel Mountain Drive | Agenda

Purpose and Objectives:

The purpose of the third Canadian Polar Data Workshop is to gather people involved in polar data management from across the country to share ideas and identify key priorities and commitments for coordinating the work of the polar data community and, ultimately, advancing our work in support of our vision.

The expected outcomes of the 2020 workshop are:

- 1) A clear governance structure for Polar data management in Canada including the design for a governing body and the initial draft of a strategic plan.
- 2) A draft dictionary of key terms for use across different data management systems and among different users of data.
- 3) An environmental scan with a draft for web publication.
